

Modules - Literature

You can set up and maintain a powerful Literature library and publish that Literature to your website.

Customers see the filename and file type icon, with a link to download the file.

Literature is a term used for any documents, files or even executable program files that can be placed on your website for download by your website visitors.

Once you have the document in the format that you would like to be uploaded, go to **Modules -> Literature**

1. Click Create a new Literature item

Literature: New Literature [More Help?](#) [Open Hints](#)

Literature Details		
Literature Name	Release Date	Enabled
<input type="text"/>	07-Jan-2009	<input checked="" type="checkbox"/>
Literature Type	Weighting	Expiry Date
Adobe Acrobat	<input type="text"/>	1-Jan-9999
